Material Safety Data Sheet Required

Thank you for your support.

In order to obtain adequate emergency response during any incident; MSDS (Material Safety Data Sheet) details are hereby “compulsorily” required from Vessel Agents for safe handling at ADT. This is especially critical if the manufacturer has placed a 24-hour Emergency Response Telephone Number on the MSDS.

A material safety data sheet (MSDS) is a form containing data regarding the properties of a particular substance, which is required at workplace to ensure safe handling; both on vessel and at storage points. It is imperative, particularly for hazardous cargo, as the conditions or methods of handling, storage, use and disposal of the product may be beyond our control and knowledge.

All shipping agents are requested **to submit the MSDS details for cargo along with Manifest submission to Port**. ADT, expressly disclaim liability for loss, damage or expense arising out of or in any way connected with the handling, storage, use or disposal of this product, if MSDS is not provided.

We appreciate your compliance.

For any queries or clarification please contact our Customer Service Phone:
00971-2-6975-(566) / (486) – Fax: 00971-2-6730432,
